

Capital and Risk Transformation (CART) Program

Execution plan summary view

July 15, 2015

The effort to build the foundational capabilities is being driven by nine workstreams focused on risk, finance, technology, and regulatory requirements 2

We have identified the fundamental root causes of our 41 CCAR MRAs/MRIAs, 3 which we have mapped to these workstreams

- ✓ More than 5 MR(I)As in the workstream affected by the category
- ✓ 1 to 5 MR(I)As in the workstream affected by the category

Category	Example root causes ¹	Number of MR(I)As affected by root causes in the category ²	Workstreams						
			Risk Transformation	Model Development	Model Risk Management	Operational Risk	Finance Transformation	Data and Technology	CCAR / DFAST
Governance	<ul style="list-style-type: none"> Lack of clear operating model between legal entities Lack of adequate governance for model approvals 	39	✓	✓	✓	✓	✓		✓
Policies and standards	<ul style="list-style-type: none"> Lack of uniform policies and standards across BHC Limited ability to enforce policies and standards at subsidiaries 	25	✓	✓	✓		✓		✓
Business involvement and ownership of risk	<ul style="list-style-type: none"> Low business involvement, ownership and accountability Ineffective or not well-defined roles in risk management (3 lines of defense) Lack of robust risk culture 	18	✓	✓	✓	✓	✓	✓	✓
Stress-testing process and methodologies	<ul style="list-style-type: none"> Inadequate standards for model development, validation and documentation Inappropriate design of stress-testing process and controls Lack of management oversight in capital planning process 	13		✓	✓		✓		✓
Data and technology	<ul style="list-style-type: none"> Lack of adequate internal data due to legal entity structure and historic issues around data quality and availability Absence of data aggregation capabilities Absence of a 'golden source' of data 	11		✓	✓			✓	
Talent and resources	<ul style="list-style-type: none"> Lack of resources to validate all models Lack of robust project management capabilities Lack of appropriate skill sets/training 	7	✓	✓	✓				✓
Implementation / execution	<ul style="list-style-type: none"> Incentives not aligned with objectives Lack of realistic plans Inability to execute against plans and adequately track progress against targets 	7				✓		✓	✓
Controls	<ul style="list-style-type: none"> Lack of appropriate model controls Lack of internal controls on aggregation Lack of appropriate audit strategy and process Lack of tools for model inventory management and tracking of validation findings 	6		✓	✓	✓			✓
Board engagement	<ul style="list-style-type: none"> Lack of board engagement 	3					✓		✓

¹ 'Root cause' examples should be read in the context of the corresponding MRA/MRIA

² Total 41 MR(I)As; several MRAs/MRIAs affected by multiple root causes

Five cross-cutting themes have emerged from this root cause analysis of the MRIsAs / MRAs

4

Category	Example root causes ¹	Number of MR(I)As affected by root causes in the category ²
Governance	<ul style="list-style-type: none"> Lack of clear operating model between legal entities Lack of adequate governance for model approvals 	39
Policies and standards	<ul style="list-style-type: none"> Lack of uniform policies and standards across BHC Limited ability to enforce policies and standards at subsidiaries 	25
Business involvement and ownership of risk	<ul style="list-style-type: none"> Low business involvement, ownership and accountability Ineffective or not well-defined roles in risk management (3 lines of defense) Lack of robust risk culture 	18
Stress-testing process and methodologies	<ul style="list-style-type: none"> Inadequate standards for model development, validation and documentation Inappropriate design of stress-testing process and controls Lack of management oversight in capital planning process 	13
Data and technology	<ul style="list-style-type: none"> Lack of adequate internal data due to legal entity structure and historic issues around data quality and availability Absence of data aggregation capabilities Absence of a 'golden source' of data 	11
Talent and resources	<ul style="list-style-type: none"> Lack of resources to validate all models Lack of robust project management capabilities Lack of appropriate skill sets/training 	7
Implementation / execution	<ul style="list-style-type: none"> Incentives not aligned with objectives Lack of realistic plans Inability to execute against plans and adequately track progress against targets 	7
Controls	<ul style="list-style-type: none"> Lack of appropriate model controls Lack of internal controls on aggregation Lack of appropriate audit strategy and process Lack of tools for model inventory management and tracking of validation findings 	6
Board engagement	<ul style="list-style-type: none"> Lack of board engagement 	3

Underlying cross-cutting themes emerging from root causes

Enhanced Governance and Oversight across SHUSA

Foundational Risk Management and Ownership of Risk across Three Lines of Defense

Strengthened Organizational Capabilities and Resources

Effectiveness and Integrity of Processes and Controls

Improved Data Quality and Robust Technology Applications

¹ 'Root cause' example summary should be read in the context of the corresponding MRA/MRIA

² Total 41 MR(I)As; several MRAs/MRIAs affected by multiple root causes

We have identified a set of core priorities for SHUSA in year one

5

Governance, reporting and functional reviews

- **Establish Comprehensive Governance and Oversight framework** that encompasses foundational elements like organization, roles, committees, reporting lines, policy framework, decision rights, delegation of authority, rollout of the 3LODs and Risk ID
- Create standardized monthly **Risk and Finance reports** by lines of businesses to ensure adequate transparency and oversight across the functions and businesses
- Initiate standardized **Risk and Finance reviews** on a monthly basis

Risk models across wholesale and retail

- Rollout strong origination practices in **wholesale banking that leverages robust Risk Rating models that are being developed** for CRE and C&I (starting with CRE rollout in year 1)
- Build **Auto and Unsecured loss models** (80% of losses) and **Auto PPNR models**

Core Data and IT

- **Build foundational Data Management capabilities** – Begin rollout of foundational data governance, data controls, data quality and the supporting IT infrastructure
- **Ensure Data Quality and Delivery** – Provide development data-sets to support prioritized modeling activities, forecasting activities and regulatory reporting
- **Build technology capabilities** to support liquidity risk management, Regulatory Reporting, and modeling

These core priorities will begin to address the themes and underlying root causes, and have been outlined in the plans that follow 6

Cross-cutting themes	Core priorities for SHUSA in year 1							
	Comprehensive Governance and Oversight Framework	Risk and Finance Reports	Risk and Finance Reviews	Wholesale Rating	Auto & Unsecured Loss Models (SCUSA)	Foundational Data Management Capabilities	Data Quality & Delivery for Modeling Forecasting, Reporting	IT Capabilities for Liquidity
Enhanced Governance and Oversight across SHUSA	✓	✓	✓					
Foundational Risk Management and Ownership of Risk across the 3 LoDs	✓	✓	✓	✓	✓	✓	✓	✓
Strengthened Organizational Capabilities and Resources	✓	✓	✓					
Effectiveness and Integrity of Processes and Controls	✓	✓	✓	✓	✓	✓	✓	✓
Improved Data Quality and Robust Technology Applications		✓	✓			✓	✓	✓

CCAR / DFAST

IHC

ELS (included in Finance Transformation)

Risk Transformation - Summary

Summary of FRB feedback

- New governance guidelines did not provide the needed clarity on how the company should conduct its affairs
- The board reporting framework is inadequate; materials presented at board and senior management committees are unclear or inconsistent
- Insufficient definition of a consolidated risk appetite statement and limit structure including level and types of risk the holding company is willing to assume from subsidiaries
- Risk identification process does not identify nor appropriately account for all risks when assessing capital needs

Sub-workstreams in Risk Transformation

- Risk governance and organization:** organizational structure of risk management to enforce the risk appetite statement, and oversight by the SHUSA Boards
- Risk appetite:** establish and communicate Board approved risk appetite
- Risk ID & measurement:** tools and processes to quantify the enterprise's risks
- Risk management processes:** measurement and management of the enterprise's risks and application to strategic business decisions
- Risk monitoring / Risk reporting:** summarize enterprise's key risks for internal and external stakeholders

Potential execution risks

- Data availability and data quality across enterprise
- Management of dependencies and related activities spanning multiple Risk workstreams (e.g. RAS, target operating model, reporting framework and templates)
- Execution risk due to effective transfer of knowledge and capabilities from external resources / consultants
- Staffing and skills requirements of the Target Operating Model will be determined for all three lines of defense during the implementation planning process; significant gaps may affect deliverables in years 2-3

Key deliverables

Key deliverables	Due by
▪ Implement routine Risk-Business reviews with reports	07/31/15
▪ Define target exec. mgmt. risk reporting landscape	09/07/15
▪ Implement near-term changes to Risk org / reporting lines	10/02/15
▪ Draft SHUSA's Governance and Oversight Framework Document	11/30/15
▪ Develop SHUSA, SBNA, and SCUSA RAS, and obtain approvals	12/31/15
▪ Enhanced top of the house risk policies and 3 LOD articulation	01/08/16
▪ Initial embedding of top-level RAS in material SHUSA processes and plan further embedding across the enterprise	01/12/16
▪ Develop and execute Material Risk Program	01/15/16
▪ Risk Operating Model design and implementation planning	04/01/16
▪ Review foundational Risk ID processes / build multiyear objectives	05/27/16
▪ Rollout Commercial Risk Ratings	07/29/16
▪ Define multiyear plan to achieve a sound target state risk culture	09/30/16

Key dependencies

- **Model Development:** Development of commercial ratings models
- **Model Risk Management:** Validation of commercial ratings models
- **Finance:**
 - Liquidity Data Mart and tools to support analytics process by second line of defense liquidity risk management
 - Implementation of the TOM across IHC entities to support LRM Framework implementation including stress testing scenarios and LST calculations (stressed inflows/outflows >90 days, non-maturity deposits)
- **Data & IT:**
 - IT development to support Commercial Risk Rating implementation / embedding in relevant processes
 - IT development for RAS, Risk ID and Risk reporting (pending planned definition of business/data requirements)
- **First Line:** Input to Material Risk Program (business line / segment Material Risk Inventories)

Risk Transformation project plan (1/4)

- Deliverables
- Milestones under the deliverable
- ✓ Completed

9

Sub-workstream	Deliverables / milestones	Start	Finish	Owner
Risk Governance & Organization	• Draft overarching Governance and Oversight Framework Document for SHUSA ¹ ; syndicate and finalize	07/15/15	11/30/15	Gunn
	— Establish core principles for governance and oversight of SHUSA and its subsidiaries, including role of and interactions with the holding company	07/15/15	07/31/15	
	— Define target state committee structure including Board and Management committees	07/15/15	8/15/15	Gunn
	— Articulate committee compositions, roles, decision rights, delegation of authority and distribution of responsibilities between the Group, SHUSA and its subsidiaries	08/01/15	09/30/15	
	— Document the overarching organization structure of SHUSA and its subsidiaries including reporting lines	08/01/15	09/30/15	Gunn
	— Develop policy framework, establish overall policies including guidelines for approval of policies	07/15/15	09/30/15	
	— Create overarching reporting framework for the Board and Management for SHUSA and its subsidiaries	10/01/15	10/31/15	Gunn
	— Syndicate Governance and Oversight Framework document with key stakeholders across SHUSA, the legal entities and the Corporation, incorporate refinements and finalize	11/01/15	11/30/15	
	• Conduct gap analysis against the overarching Governance and Oversight Framework document, identify gaps and develop multi-year execution plans	12/01/15	01/31/16	Gunn
	— Conduct gap analysis against the target state governance and committee structure, organization and roles, decision rights, delegation of responsibilities, policy framework and reporting	12/01/15	01/15/16	
	— Establish comprehensive implementation plans to address these gaps over a multi-year period	01/3/16	01/31/16	Gunn
	• Execute against multi-year plan for Risk Transformation	02/01/16	Ongoing	
	• Implement routine Risk-Business reviews with standardized materials and reports	07/13/15	07/31/15	Gunn
	• Enhance top of the house risk policies with clear articulation of roles and responsibilities across the Three Lines of Defense (3 LOD)	07/13/15	01/08/16	
	• Design Operating Model across Risk types aligned with principles of 3 LOD, develop rollout plans and implement	08/03/15	04/01/16	Gunn
	— Identify and implement near term changes to the risk organization and reporting lines across SHUSA	08/03/15	10/02/15	
	— Determine the prioritization of detailed operating model design and rollout by risk type / function	08/03/15	10/02/15	Gunn
	— Design detailed operating model and implementation plans for Risk Type / Function A & B (Most likely Credit, ERM + RAS + Strategic)	08/31/15	11/06/15	
	• Define detailed organizational structure and assess talent needs including target headcounts and skill sets	08/31/15	10/02/15	Gunn
	• Develop rollout plan	10/05/15	11/06/15	
	— Implement the redesigned Operating Model for Risk Type / Function A & B	11/09/15	11/09/16 ¹	Gunn
	— Design detailed operating model and implementation plans for Risk Type / Function C & D (Most likely Market & Liquidity, Compliance)	11/16/15	01/22/16	
	— Implement the redesigned Operating Model for Risk Type / Function C & D	01/25/16	01/25/17 ¹	Gunn
	— Design detailed operating model and implementation plans for Risk Type / Function E & F (Most likely Risk Management Information, Capital Risk)	02/01/16	04/01/16	
	— Implement the redesigned Operating Model for Risk Type / Function E & F	04/04/16	04/04/17 ¹	Gunn
	• Rollout communication and training for organizational changes related to 3 LOD	01/25/16	Ongoing	

¹ Implementation finish date may be refined during the design phase

Risk Transformation project plan (2/4)

- Deliverables
- Milestones under the deliverable
- ✓ Completed

10

Sub-workstream	Deliverables / milestones	Start	Finish	Owner
Risk Governance & Organization	• Articulate desired risk culture by setting the “Tone from the Top” and conducting a risk culture assessment	08/03/15	10/02/15	Gunn
	• Define multiyear plan to achieve a sound target state risk culture	07/01/16	09/30/16	Gunn
	• Assess existing Risk Management Performance Scorecards and identify gaps	06/15/16	12/18/15	Gunn/ Briongos
	• Rollout systematic performance assessments and risk-based compensation structures	04/01/16	01/02/17	Gunn/ Briongos
	• Diagnose retention challenge and design recruitment and retention mechanisms	07/01/16	04/04/17	Gunn/ Briongos
Risk Appetite Statement (RAS)	• Develop interim RAS for SBNA and SCUSA, and begin ongoing monitoring	06/08/15	09/30/15	Smith/ Parrish
	• Develop SHUSA, SBNA, and SCUSA RAS, and obtain approvals	06/08/15	12/31/15	Smith/ Parrish
	— Develop SHUSA-level RAS (top-down approach)	06/08/15	08/28/15	
	— Develop SBNA- and SCUSA-level RAS (bottom-up approach), ensuring alignment to SHUSA RAS	06/08/15	11/20/15	
	— Establish related processes and documentation for ongoing management of RAS (e.g. breach escalation and remediation process – including consequences)	07/06/15	11/20/15	
	— Secure Board approval of SHUSA, SBNA, and SCUSA RAS	08/31/15	12/31/15	
	• Communicate Board-approved SHUSA, SBNA, and SCUSA RAS to enterprise	12/01/15	02/24/16	Smith / Parrish
	• Design RAS for remaining subsidiaries (NY, Puerto Rico, Miami) and obtain approvals	02/01/16	06/30/16	Smith / Parrish
	— NY RAS design and approval	02/01/16	06/30/16	
	— Puerto Rico RAS design and approval	02/01/16	06/30/16	
	— Miami RAS design and approval	02/01/16	06/30/16	
	• Initiate embedding of RAS in material SHUSA processes and plan for embedding RAS across the enterprise	11/02/15	01/12/16	Smith / Parrish
	— Identify key processes (e.g. strategic planning, capital planning) and update process maps with explicit RAS links	11/02/15	11/27/15	
	— Initiate implementation of RAS in all material processes	11/30/15	01/12/16	
	• Continue to cascade the risk appetite statement for the remainder of subsidiaries and business units and ensure alignment with overall SHUSA risk appetite statement	01/01/16	06/30/16	Smith / Parrish
Risk ID & Measurement	• Cascade the embedding of the risk appetite statement for key processes across the organization	01/01/16	06/30/16	Smith / Parrish
	• Continue to communicate risk appetite statement throughout the enterprise, including training in the new escalation and remediation process	04/01/16	09/30/16	Smith / Parrish
	• Periodically enhance risk appetite statement based on the latest results of material risk identification and improved risk measurement across the enterprise; including incorporation of risk-based capital metrics	10/03/16	06/30/17	Smith / Parrish
	• Design and execute the Material Risk Program across SHUSA (leveraging existing data and technology)	02/02/15	01/15/16	Allaire
	— Design material risk program and obtain approvals (incl. risk taxonomy, tools, templates, guidance)	02/02/15	05/01/15 ✓	
	— Create risk inventory for the Subsidiaries / Business Entities and hold workshops for aggregation	05/28/15	10/02/15	
	• Compile Business Line / Segment Material Risk Inventory	05/28/15	07/31/15	
	• Hold Subsidiary / Business Entity Aggregation Workshops (include 2nd LOD challenge) and Governance (Material Risk Inventory Reviews / Approvals)	08/03/15	10/02/15	

Risk Transformation project plan (3/4)

11

- Deliverables
- Milestones under the deliverable
- ✓ Completed

Sub-workstream	Deliverables / milestones	Start	Finish	Owner
Risk ID & Measurement	— Create risk inventory for the SHUSA, hold workshops for aggregation	10/05/15	01/15/16	
	• Preparation for Aggregation to create SHUSA Material Risk Inventory	10/05/15	10/19/15	
	• Hold SHUSA Aggregation Workshops (include 2nd LOD challenge)	10/12/15	10/26/15	
	• Execute on SHUSA Top Down Aggregation (1st and 2nd LOD executive challenge)	10/26/15	11/09/15	
	• Obtain approvals for Material Risks of SHUSA (final aggregation, Board and Management review and challenge)	11/09/15	12/04/15	
	• Draft Risk ID and Assessment Policy and obtain approvals	10/26/15	01/15/16	
	• Establish clear linkage of MRP outputs to capital planning scenario design process	10/12/15	12/04/15	
	• Review foundational Risk ID processes including data and technology supporting the Material Risk Program and build multi-year enhancement objectives	01/18/16	05/27/16	Smith
	— Assess foundational Risk ID processes and ensure complete foundational risk inventory is in place	01/18/16	02/26/16	
	— Review each foundational Risk ID process, identify deficiencies in data, technology and processes, and use gap analyses to determine how to optimize	02/29/16	05/13/16	
Risk Management Processes	— Develop remediation plans for foundational Risk ID processes	04/27/16	05/27/16	
	• Execute remediation plans for foundational Risk ID processes, including requirements definition, development and implementation of planned data and technology solutions to support risk identification (e.g. automated interface for risk inventory template, database for foundational inputs and data sources for risk identification, etc.)	05/30/16	05/31/17 ¹	Smith
	• Updated SHUSA Risk taxonomy for Material Risk Program	11/30/15	01/15/16	Allaire
	• Updated material risk inventory template and guidance for Material Risk Program	01/18/16	02/26/16	Allaire
	• Develop training materials, policies and procedures based on updated Material Risk Program process	02/29/16	06/17/16	Allaire
	• Analyze and remediate gaps in liquidity risk management (“LRM”) against IHC requirements	11/03/14	11/30/15	Aya
	• Design Liquidity Stress Test Challenge Process Framework and get approvals	06/01/15	12/31/15	Aya / Lasso
	• Perform high-level review and revision of wholesale credit process limits and controls and delegation of authority at SCUSA and SBNA	02/01/16	03/31/16	Hennessy / Cuervo
	• Rollout Commercial Risk Ratings	05/04/15	07/29/16	Spector
	— Establish governance and oversight on commercial risk ratings governance	06/01/15	07/31/15	
	— Rollout redesigned CRE rating models	06/29/15	05/27/16	
	• CRE model development and validation (refer to Model Dev. / Model Risk workstreams ²)	06/29/15	11/18/15	
	• CRE UAT / pilot testing	02/01/16	04/01/16	
	• CRE end-user training	02/01/16	05/27/16	
	• CRE initial model implementation / rollout	04/04/16	05/06/16	

¹ Implementation finish date may be refined during the design phase

² Refer to Model Development and Model Risk Management workstreams for relevant dates on development and validation

Risk Transformation project plan (4/4)

- Deliverables
- Milestones under the deliverable
- ✓ Completed

12

Sub-workstream	Deliverables / milestones	Start	Finish	Owner
Risk Management Processes	— Rollout redesigned C&I rating models	06/22/15	07/29/16	
	• C&I model development and validation (refer to Model Dev. / Model Risk workstreams ¹)	06/22/15	01/14/16	
	• C&I UAT / pilot testing	04/04/16	06/03/16	
	• C&I end-user training	04/04/16	07/29/16	
Risk Monitoring / Risk Reporting	• C&I initial model implementation / rollout	06/06/16	07/01/16	
	— Create requirement definitions for long-term technology solution for CRE and C&I model implementation	05/04/15	04/15/16	
	• Conduct gap analyses across risk types focusing on methodology, tools, processes, and expectations as defined by the operating model and benchmark to industry practice	07/01/16	09/30/16	Hennessy / Smith
	• Create remediation plans to address gaps and initiate remediation actions	08/03/16	12/04/16	Hennessy / Smith
Risk Monitoring / Risk Reporting	• Assess current reporting landscape and make quick-win enhancements to priority reports (Board and Level 1 Risk Committees) and reporting protocols	06/15/15	08/17/15	Coutinho
	— Document detailed business and data requirements for SHUSA Monthly Risk Report and deliver to T&O for BCBS 239 compliance	06/15/15	08/17/15	
	• Define target exec. mgmt. risk reporting landscape and scope of remediation (linked to committee structure)	07/27/15	09/07/15	Coutinho
	• Identify risk aggregation needs and cultivate dedicated resources to manage reporting	08/31/15	01/29/16	Coutinho
	• Develop and implement Wave 1 of exec. mgmt. reporting enhancements	08/31/15	11/09/15	Coutinho
	— Develop template reports for Wave 1 and socialize	08/31/15	09/25/15	
	— Roll-out of Wave 1 reports (similar process for all waves)	09/28/15	11/09/15	
	• Review business/data requirements for interim and target state of Wave 1 reports and update as needed	09/28/15	10/23/15	
	• Identify and document data gaps and develop remediation plans	09/28/15	11/09/15	
	• Pilot reports using available data (manual where necessary)	09/28/15	10/09/15	
	• Collect feedback from key stakeholders and refine reports	10/26/15	11/06/15	
	• Implement refined reports in-production	11/06/15	11/09/15	
	• Develop and implement Wave 2 of exec. mgmt. reporting enhancements	10/05/15	12/28/15	Coutinho
	— Development of template reports and socialization of Wave 2 (based on materiality)	10/05/15	10/30/15	
	— Roll-out of Wave 2 reports (similar process as Wave 1)	11/02/15	12/28/15	
	• Develop and implement Wave 3 of exec. mgmt. reporting enhancements	12/28/15	04/01/16	Coutinho
	— Development of template reports and socialization of Wave 3 (Remaining Entities)	12/28/15	01/29/16	
	— Roll-out of Wave 3 reports (similar process as Wave 1)	02/01/16	04/01/16	
	• Execute on Remediation Plans and Roll-out Enhanced Reports	04/01/16	01/02/17	Coutinho
	• Develop and launch additional waves of reporting enhancements as needed	04/01/16	09/30/16	Coutinho
	• Refine data requirements/resources to enhance quality of reports	04/01/16	09/30/16	Coutinho
	• Develop quality assurance plans and controls for newly enhanced reports	04/01/16	09/30/16	Coutinho
	• Assess resource needs and implement additional refinements to monitoring requirements	04/01/16	03/31/17	Coutinho

Risk Transformation

Model Development

Model Risk Management

Operational Risk

Finance Transformation

Data and IT

CCAR / DFAST

IHC

ELS (included in Finance Transformation)

Model Development - Summary

Summary of FRB feedback

- Redevelop wholesale credit risk measurement
- Enhance loss forecasting and PPNR framework
- Identify internal data limitations and use external data when necessary
- Follow model development standards that aligns with SR11-7, including (data source integrity; documentation; sensitivity analysis; testing and implementation; operational controls; performance monitoring; third-party modeling)
- Implement a net interest income projection process to meet supervisory expectations of the ROPE paper sensitivity analysis

Sub-workstreams in Model Development

- Organization:** Define a Model Development organizational structure
- Hiring Plan:** Develop a plan to identify and attract to ensure the success of the model development teams
- Standards:** Promulgate model development standards for all entities
- Model Reference Library:** Establish a reference library of modeling procedures, standardized reporting templates and other support materials
- Model Landscape:** Develop multi-year plan to address development needs
- Monitoring:** Ensure appropriate model performance monitoring reports are generated and reviewed regularly and are informing remediation activities
- Qualification:** Encourage professional development and ensure mathematical models are developed by qualified personnel

Potential key risks

- Data availability and data quality across enterprise
- Tight timeline to complete talent sourcing for the Model Development organization

Key deliverables

Key deliverables	Due by
▪ Develop CCAR model development prioritization process	05/22/15
▪ Develop and approve organizational chart	07/31/15
▪ Identify hiring plan gaps and establish hiring standards	07/31/15
▪ Transition existing staff to new organizational structure	08/28/15
▪ Develop and send to validation CCAR 2016 models based on approved Model Landscape & Roadmap	10/30/15
▪ Develop SHUSA Enterprise Model Develop Standards (incl. CCAR)	12/16/15
▪ Approve performance monitoring remediation action plans (Tier 1)	12/30/15
▪ Execute 90% of hiring plan	06/30/16
▪ Populate the Model Reference Library	07/01/16
▪ Develop and approve Professional Qualification Standards Handbook	10/03/16

Key dependencies

- **Risk Transformation:**
 - Risk appetite principles
 - Operating model
 - Individual risk reporting framework and templates
- **Model Risk Management:**
 - Review of Model Development policies, procedures, standards
 - MRM Framework and Policies
 - CCAR Model Validation results
 - Legacy Models Risk and Gap assessments
- **Data & IT:**
 - Data for modelling, enhanced through data quality program
 - Platform for Model Reference Library
 - Data Architecture for CCAR 2017
- **CCAR:** Macroeconomic variable forecasts
- **HR:**
 - Approved staffing/hiring strategy
 - Fulfilment of staffing needs
- **Model User:** Gather business requirements and feedback from SBNA and SCUSA CFO, CRO and Line of Businesses

Model Development project plan (1/4)

15

- Deliverables
- Milestones under the deliverable
- ✓ Completed

Sub-workstream	Deliverables / milestones	Start	Finish	Owner
SHUSA Model Development organization	• Specify organizational vision and objectives	05/22/15	06/26/15	✓ Silloway
	• Develop and approve organizational chart	06/05/15	07/31/15	Silloway
	— Define individual and team roles	06/05/15	07/23/15	
	— Articulate reporting lines	06/05/15	07/23/15	
	— Submit draft organizational chart	07/23/15	07/24/15	
	— Review, critique, and revise	07/24/15	07/30/15	
	— Approve organizational chart	07/30/15	07/31/15	
	• Communicate organizational chart (at SHUSA and entities)	08/03/15	08/07/15	Silloway
Hiring plan	• Receive staffing assessment output from Risk Transformation	02/29/16	02/29/16	Smith
	• Review, adjust and communicate org chart if needed	02/29/16	04/01/16	Silloway
	• Develop job descriptions for SHUSA model development organization	06/26/15	07/31/15	Silloway
	• Identify hiring plan gaps and establish hiring standards	06/26/15	07/31/15	Silloway
	— Determine talents and skill sets of existing staff	06/26/15	07/31/15	
	— Conduct gap analysis of current staffing and hiring plan	06/26/15	07/31/15	
	— Identify "high performance" values and behaviors	07/06/15	07/31/15	
	• Transition existing staff to new organizational structure	07/20/15	08/28/15	Silloway
SHUSA Enterprise Model Development Standards	• Engage external recruiting resources (if needed)	06/29/15	08/28/15	Ciano
	• Train recruiting teams on the hiring standards	06/29/15	08/28/15	Silloway/Ciano
	• Post job openings	07/23/15	08/28/15	Ciano
	• Onboarding procedure	07/20/15	08/18/15	Silloway
	• 90% of Hiring Plan executed	07/20/15	06/30/16	Silloway
	• SHUSA Enterprise Model Development Standards	07/06/15	12/16/15	Silloway
	— Inventory existing standards, procedures, guidelines, etc.	07/06/15	08/14/15	
	— Identify best practice (data source selection, data integrity, and data treatment; estimation techniques; documentation criteria; sensitivity analysis; testing and implementation; operational controls; performance monitoring; model change management; third-party modeling products and services; review and challenge)	08/17/15	10/09/15	
	— Submit draft SHUSA Enterprise Model Development Standards	10/12/15	10/12/15	
	— Review and critique against model risk management standards	10/13/15	11/09/15	
	— Approve SHUSA Enterprise Model Development Standards	11/10/15	11/10/15	
	— Ratify SHUSA Enterprise Model Development Standards	11/11/15	11/17/15	
	— Conduct training	11/11/15	12/16/15

		01/20/17	06/06/17	Iyer / Pruneda

For each model/model type, the start and end dates contemplates the following milestones:

- Establish project management
- Host kick-off meeting
- Obtain business requirements
- Create development dataset
- Conduct segmentation analysis
- Within each model, the segmentation exercise will determine the prioritization of certain segments in development for CCAR 16 vs. 2017 model estimation
- Model estimation
- Model testing (incl. back testing, sensitivity analysis, etc.)
- Model documentation
- Operational controls
- Model performance monitoring
- Submit model to MRMG for validation

The following milestones are not included in the start and end dates, and will be added to the project plan once the Segmentation Scheme is approved:

- Post-validation review and remediation plan
- UAT - Review model output with model owner
- Implementation - Produce Forecast
- Implementation - Implement connectivity with reporting tool(s) / SAS Engine

Model Risk Management - Summary

Summary of FRB feedback

- Develop a formal SAN-US model risk management governance and oversight
- Develop a comprehensive plan to implement an effective model risk management framework
- Strengthen model risk management leadership as well as the quantity and quality of staff
- Develop a detailed and comprehensive inventory
- Perform rigorous validation of models within an appropriate timeline and remediate validation findings;
- Complete comprehensive model documentation and validation reports and
- Provide clear communication and reporting to the Board

Sub-workstreams in Model Risk Management

- Governance and Reporting:** Formal governance, oversight and reporting structure that clearly defines and aligns roles and responsibilities rolled out from the SHUSA Board to individual business units
- MRM Framework:** Effective framework covering standards, policy, procedures, and education across the end-to-end model lifecycle and a comprehensive model inventory
- Model Validation:** Comprehensive and consistent validation of all models and a clear process and framework for regular model reviews
- MRM Leadership and Staffing:** Adequate quality and quantity of staffing for MRM taking into account the existing workload, backlog and remediation efforts. Assessment and hiring strategy for all three LoDs

Potential execution risks

- Uncertainty of the quality and complexity of models and data quality including timeline for delivery of models for validation. Review with Model Development scheduled in August.
- Restructuring of SHUSA committees and changes to overall MRM governance process (e.g., charter updates, policy approval and implementation)
- Need for approval of MRM framework -- the planned timeline could be affected by changes to standards and requirements from Santander Group
- Ability to staff team given industry-wide competition for talent

Key deliverables

Key deliverables	Due by
▪ Strengthen Board and Management oversight: SHUSA charter	10/30/15
▪ Enhance MRM Reporting: enhance BAU reporting standards	11/30/15
▪ Perform near-term hiring based on validation backlog, CCAR and CART assessment	12/31/15
▪ Define target operating model for long term staffing solution	12/31/15
▪ Validate CCAR 2016 Models	03/31/16
▪ Address Legacy Model Validation Backlog: conduct Tier 1 model risk and gap assessment	04/29/16
▪ Validate Liquidity Risk Framework	05/27/16
▪ Strengthen Board and Management oversight: cascading to entities	06/30/16
▪ Implement Periodic Revalidation Process	03/31/17
▪ Enhance MRM Framework, Policy / Procedures / Standards / Templates	03/31/17
▪ Develop and Implement Controls and Monitoring/Review Process	06/16/17

Key dependencies

- **Risk Transformation:**
 - Risk appetite principles
 - Target operating model (TOM)
 - Individual risk reporting framework and templates
- **Model Development:**
 - Schedule for model validation readiness
 - Submission of models for validation on schedule
 - Model remediation plans
 - Model Development policies, procedures, standards for review
- **Finance:** LRM Framework for review
- **Data & IT:** Access to the modelling dataset
- **T&O, Internal Audit, and First Line:** assume roles and responsibilities per MRM policy
- **Enterprise Policy Administration (EPA):** Reviews, feedback and final EPA certification
- **Legal:**
 - Committee structure and dates
 - Charter and policy updates approval

Model Validation	• Address Legacy Model Validation Backlog	06/19/15	07/15/16	MacManus
	— Define framework for model risk and gap assessment	06/19/15	06/25/15 ✓	
	— Prioritize legacy models according to identified metrics	06/19/15	08/07/15	
	— Collect and review legacy validation findings	08/03/15	08/31/15	
	— Perform Risk and Gap assessment (RGA) for highest priority legacy Tier 1 models	06/29/15	10/15/15	MacManus / Silloway
	— Review Model Development and MRM RGA results and Model Development's Performance Monitoring assessment with Model Development, agree on remediation plans and resource needs	09/29/15	12/16/15	
	— Complete validation of initial set of highest priority legacy Tier 1 models	10/16/15	12/31/15	
	— Perform risk and gap assessment for remaining legacy Tier 1 models	12/17/15	04/29/16	
	— Update validation plan and project plan	02/01/16	07/15/16	MacManus
	• Validate Models	06/15/15	12/29/17	
	— Define initial validation schedule/dates and with Model Development	06/15/15	06/30/15 ✓	
	— Collect and review validation findings	08/03/15	08/31/15	
	— Refine validation schedule w/ Model Development based on portfolio segmentation, model inventory, and CCAR Aggregation Platform	08/15/15	08/28/15	MacManus
	— Perform Model validation			
	• Risk Weighted Assets (includes remediation plan development by Capital Planning)	08/01/15	10/15/15	
	• CRE Risk Rating	08/18/15	11/18/15	
	• C&I Risk Rating	10/14/15	01/14/16	
	• Unsecured Loss Estimation (PD and LGD)	10/16/15	01/16/16	
	• Auto Lending Loss Estimation (PD and LGD)	11/02/15	02/02/16	
	• Auto Lending PPNR (Origination and Pricing)	11/02/15	02/02/16	
	• Deposit PPNR (Balance and Pricing)	03/01/16	06/01/16	
	• CRE Loss Estimation (PD, LGD and EAD)	09/29/17	12/29/17	
	• CRE PPNR (Origination and Pricing)	05/02/16	08/02/16	
	• CRE PPNR (Utilization and Prepay)	07/01/16	10/01/16	
	• C&I Loss Estimation (PD, LGD and EAD)	09/29/17	12/29/17	
	• C&I PPNR (Orig, Utiliz, Prepay and Pricing)	07/29/16	10/29/16	
	• OTTI (new vendor)	08/01/16	11/01/16	
	• Residential RE Loss Estimation (PD and LGD)	09/22/16	12/23/16	
	• Residential RE PPNR (Orig./ Utiliz. and Pricing)	10/03/16	01/03/17	
	• Residential RE Loss Est (HELOAN PD and LGD)	05/30/17	08/30/17	
	• Residential RE PPNR (HELOAN Orig and Pricing)	06/07/17	09/07/17	

For each model/model type the Model Risk Management team will validate the following:

▪ Review the models and create work plan

▪ Model Development Elements

- Model Theory and Approach
- Model Development Data
- Model Estimation / Development

▪ Model Production Application

- Implementation Testing Documentation
- Technical Specifications
- User's Guide or Operating Procedures
- Operational Controls
- Business Continuity Planning

▪ Ongoing Governance

- Ongoing Risk and Performance Monitoring
- Assumptions Management
- Change Management

Additional items post-validation:

- Confirm validation findings with 1st LoD
- Approve validation findings and communicate to CCAR
- Notify Model Development for remediation

Operational Risk - Summary

Summary of FRB feedback

- ORM framework is not sufficiently developed to identify, measure and monitor firm's risks
- SHUSA must implement a robust, comprehensive data collection method, use complete data sets when modeling
- Significant issues identified in SHUSA's recently re-developed model to forecast ops risk losses, some of which were the same as cited in CCAR 2014

Sub-workstreams in Operational Risk

- Risk appetite:** communicate key risk/return trade-offs and tolerance, aligned with overall SHUSA enterprise risk appetite
- Governance and organization:** organizational structure of ORM to ensure strong loss and event data capture, as well as sound methodology to estimate stressed losses and roll-out of ops risk framework
- Risk ID & measurement:** tools and processes to quantify SHUSA's true operational risk profile, e.g., robust loss and event data capture, near misses, risks and controls self-assessment ("RCSA")
- Risk management processes:** management of SHUSA's operational risks (informed by risk ID and measurement) and application to strategic decisions
- Risk monitoring:** reports to key internal and external stakeholders, including the SHUSA Board, summarizing the enterprise's risks

Potential execution risks

- Limitations in the quality and history of internal loss data
- Dependency on the timely delivery of technology solution for issue management, loss data collection
- High dependency on external resources, consultants and vendors
- Ability to attract the right talent particularly in the first line of defense to drive ownership and accountability

Key deliverables

Key deliverables	Due by
Approve operational risk framework	01/29/16
Approve operating model for operational risk	01/30/16
Revise existing thresholds for Material Event Escalation	03/31/16
Establish operational risk policies & standards across SHUSA entities	03/31/16
Implement operational risk Loss Forecasting for CCAR and document	03/31/16
Initiate Issue ID and Loss Data Capture	03/31/16
Roll out Scenario Analysis	12/31/16
Implement prioritized set of operational risk metrics for Risk Appetite	12/31/16
Initiate use of operational risk reports in management decision making	12/31/16
Initiate operational Risk Y-14Q Reporting	03/31/17
Roll out Information Risk Management (IRM) Tools and Processes	06/30/17
Roll out Business Continuity Management (BCM) Tools and Processes	09/30/17
Conduct skills assessment and training	Ongoing
Roll out Third Party Risk (TPR) Tools and Processes	Ongoing

Key dependencies

- Risk Transformation:**
 - Operational risk metrics for Risk Appetite – a documented set of recommended enhanced operational risk limits with clear rationale, definitions and thresholds
 - Operational risk framework
 - Operating model
 - Operational Risk Policies and standards across all legal entities
- Model Risk Management:** Validation of regression models used in core stress testing loss methodology
- Data & IT:**
 - Issue management & Loss data capture tools
 - Automated reporting of Y'14Q from "golden source"

Operational Risk project plan (1/3)

- Deliverables
- Milestones under the deliverable
- ✓ Completed

Sub-workstream	Deliverables / milestones	Start	Finish	Owner
Risk Appetite	• Implement prioritized set of operational risk metrics for Risk Appetite (SHUSA / SBNA / SCUSA)	06/15/15	12/31/16	Gunn
	— Document prioritized set of operational risk limits with clear rationale, definitions and thresholds	06/15/15	08/31/15	
	— Implement processes to effectively monitor and report on prioritized operational risk limits	09/01/15	12/31/16	
	• Implement operational risk metrics for Risk Appetite for all other entities	01/01/16	12/31/16	
Governance & Organization	• Approve Operational risk framework	09/01/15	01/29/16	Gunn
	— Approve SHUSA operational risk framework	09/01/15	01/29/16	
	• Approve operating model for operational risk	08/06/15	01/30/16	Gunn
	— Define key gaps in the operating model	08/06/15	11/30/15	
	— Draft operating model	09/03/15	12/31/15	
	— Approve final operating model design	01/01/16	01/30/16	
	• Establish operation risk policies and standards across SHUSA legal entities	07/01/15	03/31/16	Gunn
	— Establish and approve SHUSA Enterprise Operational Risk Management Policy and Standards (incl. Issue Management, Loss Data Capture) based on gap analysis	07/01/15	12/31/15	
	— Establish implementation plan for SHUSA Enterprise ORM Policy and Standard and institute monitoring	01/01/16	03/31/16	
	— Establish and approve SHUSA RCSA Methodology aligned with industry standard	07/01/15	12/31/15	
	— Establish implementation plan for SHUSA RCSA rollout	01/01/16	03/31/16	
	— Establish and approve SHUSA Enterprise Information Risk Management Policy and Standards based on gap analysis	07/01/15	12/31/15	
	— Establish implementation plan for SHUSA Enterprise IRM Policy and Standard and institute monitoring	01/01/16	03/31/16	
	— Establish and approve SHUSA Enterprise Third Party Risk Management Policy and Standards based on gap analysis	07/01/15	12/31/15	
	— Establish implementation plan for SHUSA Enterprise TPRM Policy and Standard and institute monitoring	01/01/16	03/31/16	
	— Establish and approve SHUSA Enterprise Business Continuity & Disaster Recovery Policy and standards based on gap analysis	07/01/15	12/31/15	
	— Establish implementation plan for SHUSA Business Continuity & Disaster Recovery and institute monitoring	01/01/16	03/31/16	
	• Conduct skills assessment and training	01/01/16	Ongoing	Gunn
	— Execute skills assessment, develop training requirements for SHUSA, SBNA and SCUSA	01/01/16	06/30/16	
	— Execute skills assessment, develop training requirements for the other legal entities	01/01/16	09/30/16	
	— Initiate rollout of relevant training	07/01/16	Ongoing

ELS (included in Finance Transformation)

Finance Transformation (including ELS) - Summary

Summary of FRB feedback

- Develop a capital planning governance structure that includes committee, organizational, and policy structures that incorporate all entities within BHC
- Ensure that SHUSA has a comprehensive capital policy that addresses the major components of SHUSA's capital planning process and links to, and is supported by, other policies

Sub-workstreams in Finance transformation

- **Capital Planning and Management:** Management of effective capital governance, adequacy, strategy, controls, and reporting
- **Accounting, Tax and Reporting:** Consolidation and reporting of financial statements and supporting information to regulators and the parent
- **Treasury:** Operationalization of SHUSA's consolidated Liquidity Risk Management (LRM) framework, including establishment of the LRM data warehouse
- **Financial Planning and Analysis:** Development of capabilities for strategic planning and forecasting, reporting and analysis, and business performance analytics

Potential execution risks

- Dependency on the timely delivery of technology capabilities (significant T&O dependencies)
- Dependency on timely delivery of robust modeling solutions
- Ability to scale internal talent within tight timelines (timing and availability of quality resources)
- Lack of visibility into future staffing needs

Key deliverables

	Due by
▪ Enhance RWA forecasting process for SHUSA and material entities	12/31/15
▪ Implementation of robust set of assumptions for PPNR models and non-modelled assumptions for CCAR	12/31/15
▪ Enhance forecast and aggregation process and tool	12/31/15
▪ Develop and implement Enterprise Liquidity Risk Management (LRM) framework	03/15/16
▪ Revise and implement capital policies for SHUSA and its subsidiaries	04/01/16
▪ Consolidated reporting (SEC, Regulatory, Tax, and Management); improve processes and consolidation controls including reconciliations between sources of historical data and reporting; and increased amount of general ledger information available from direct system feeds	06/30/16

Key dependencies

- **Data & IT:**
 - Availability of quality data for:
 - Capital and strategic planning
 - Consolidated regulatory reporting
 - Production of 2052A liquidity report
 - Successful implementation of Hyperion and reporting capabilities
 - SAS forecasting tool implementation and Vena enhancement to populate FR Y-14A filings
- **Risk Transformation:** Material Risk Program outputs
- **Model Development:**
 - Development of PPNR forecast methodologies/assumptions
 - New deposits model to support additional analysis including stable/non stable, operational deposits and insured/non-insured
 - Timely completion of model development and validation, or alternate approaches to produce a valid forecast
- **Model Risk Management:** Liquidity Risk Management Framework validation

Sub-workstream	Deliverables / milestones	Start	Finish	Owner
Capital Management	• Capital policies for SHUSA and its subsidiaries revised and implemented:	07/06/15	04/01/16 ¹	Simon
	— Revise and implement capital policies for SHUSA and material subsidiaries	07/06/15	11/27/15	Simon
	• Enhance Governance and Internal Controls sections	10/05/15	10/30/15	
	• Enhance Capital Expectations sections	07/06/15	10/30/15	
	• Enhance Capital Assessment Process sections	09/07/15	10/09/15	
	• Enhance Capital Early Warning Indicators section	11/23/15	11/27/15	
	• Enhance Capital Generation and Deployment sections	08/17/15	11/06/15	Simon
	— Revise and implement Capital Contingency Policy	10/19/15	11/27/15	Simon
	— Update Contingent Capital Plan	10/05/15	04/01/16	Simon
	• Integration of MIA-BSI, NY-SIS and PR entities into the SHUSA forecasting process for CCAR 2016	07/13/15	03/11/16	Simon / Budington
	— Conduct foundational data gathering and assessment for all available historical data (Balances, Fees and Expenses, Interest Income/Expense, Pricing, Losses, ALLL)	07/13/15	09/07/15	Simon
	— Develop forecasting methodologies for Balance Sheet, PPNR, Losses and ALLL	08/17/15	12/31/15	Budington
	— Develop processes for aggregation, internal controls, and populating FR Y-14A contributor files	10/05/15	12/31/15	Simon
	— Effective integration of MIA-BSI, NY-SIS and PR entities in stress testing process	02/29/16	03/11/16	Simon
	• Implementation of enhanced reporting to Board and Management Capital Committee to enable effective governance	05/04/15	01/22/16	Garcia
	— Enhance standards and metrics for quarterly Capital Management reports	12/07/15	01/22/16	Simon
	— Institute processes to generate monthly Capital Management reports	05/04/15	12/18/15	Barris
	• Enhanced and strengthened forecast and aggregation process:	05/04/15	12/31/15	Garcia
	— Produce enhanced FRY-14A through automation in VENA for CCAR 2016	05/04/15	12/31/15	Barris
	— Develop, document and test customized SAS forecast and aggregation process and tool (see FP&A work plan)			Budington
	• Enhancement of RWA Forecasting process for SHUSA and material entities	07/13/15	12/31/15	Barris
	— Fully align RWA forecasting approach to Basel III	09/14/15	10/09/15	Barris
	— Implement SSFA forecasting model	07/13/15	10/31/15	Barris
	— Enhance RWA documentation (policies, procedures, methodologies and assumptions)	10/19/15	12/31/15	Barris

¹ Continued enhancements in 2017 – 2018, based on feedback from Audit and FRS or any significant changes to SHUSA and subsidiary businesses

Finance Transformation project plan (2/4)

33

- Deliverables
- Milestones under the deliverable
- ✓ Completed

Sub-workstream	Deliverables / milestones	Start	Finish	Owner
Capital Management (continued)	• Phased build out of strategic enhancements to the capital planning for 2017 – 2018:	01/01/15	09/01/18	Garcia
	— Implement forward-looking measure of stress in the capital expectations	06/01/16	12/01/17	Garcia
	— Enhance the stress-testing and forecasting process by using accurate historical data and improving methodologies through automation	06/01/16	06/01/17	Garcia
	— Fully integrate the MIA-BSI, NY-SIS and PR entities into the SHUSA forecasting processes and tools	06/01/16	09/01/18	Garcia
	— Transition to a central data warehouse for all forecasting data	06/01/17	09/01/18	Garcia
Accounting, Tax, and Reporting	• Consolidated reporting across SHUSA and subsidiaries (SEC, Regulatory, Tax, and Management); improved processes and consolidation controls including reconciliations between sources of historical data and reporting; and increased amount of general ledger information available from direct system feeds	01/15/15	06/30/16	Reinhard
	— Establish control model across appropriate sources of financial data for financial/regulatory reports (Y-9C, Y-14's, SEC, and other regulatory reporting)	06/01/15	12/31/15	Boyle
	— Implement Hyperion platform for consolidated financials reporting	01/15/15	06/30/16	Reinhard
	— Produce FRY-14M, Y14Q Granular Schedules	02/02/15	06/30/16	Ratican
	— Produce Purchase Mark Accounting	07/15/15	02/29/16	Ratican
	— Establish reconciliation process between reporting tools and HFM	11/30/15	06/30/16	Reinhard
	• Phased implementation of further automation of consolidated reporting process across SHUSA and subsidiaries (long term architecture)	06/30/16	12/21/18	Reinhard
	• Deploy a uniform reconciliation tool (SHUSA and subsidiaries)	03/01/16	12/31/17	Omole
	• Homogenize accounting policies for SHUSA and subsidiaries	01/01/15	10/31/15	Velazquez
	• Expand Tax Provision to support all subsidiaries	06/01/15	06/30/16	Swartz
	• Establish methodology for calculation of taxable income, tax expense, and release of deferred taxes, etc. for SHUSA, SCUSA, SBNA plus all subsidiaries	06/01/15	12/31/15	Swartz

Data and IT - Summary

Summary of FRB feedback

- Immediately develop a plan to comprehensively identify, define, and remediate data deficiencies in order to measure and monitor risk, conduct capital planning, and complete required regulatory reporting. The plan should also include a data governance and data quality program to oversee data remediation efforts and ensure robust data collection and maintenance practices going forward.
- Perform a gap analysis of the firm's IT infrastructure and data management systems that support the end-to-end capital planning process. A project plan...developed to address identified gaps within a timeframe that reflects the complexity of the remediation efforts.

Sub-workstreams in Data and IT

- Technology and capabilities gap assessment: Rigorous and fact-based gap assessment using a quantitative and qualitative methodology followed by development of a project plan to adequately address the gaps
- Target-state IT architecture infrastructure and tools: Definition of target-state architecture to deliver on long-term goals of the CART program, automation of modelling and CCAR schedule production, including implementation of data warehouses
- Effective data governance and data quality program: Execution of programs enforcing strong assignment of ownership and stewardship and building structured and repeatable data quality, and creation of end-to-end data control framework
- Data delivery: Creation of a data clearinghouse to support data requirements from the business, documentation of data lineage and controls for critical manual processes, and implementation of security programs

Potential key risks

- Limited technology and business resources as well as recruitment challenges within set timeframe to accomplish committed deliverables

Key deliverables

Key deliverables	Due by
▪ Develop SAS Cloud / Grid data environment	07/31/15
▪ Load CCAR modeling data requirements into SAS environment	08/14/15
▪ Implement SHUSA privileged access management – access attestation & certification solution Phase 1	12/31/15
▪ Conduct a comprehensive gap assessment in IT infrastructure and data management systems	12/31/15
▪ Build data management and quality (DQ) control centers	01/31/16
▪ Design the data management program	02/29/16
▪ Design detailed target state IT architecture for CART program	06/30/16
▪ Enhance QRM operating environment	05/01/17
▪ Build enterprise data warehouse(s)	12/31/17

Key dependencies

Risk Transformation, Model Development, Operational Risk, Model Risk Management, Finance Transformation:

- Business requirements for data needs and IT developments
- Agreed List of Data Domain Definition Documents
- Established Owners, Stewards, Working Groups for Data Governance program
- KDEs Identified, Documented and Approved by Domain
- KDE prioritization
- Data Domains Rollout

Data & IT project plan (1/6)

CCAR / DFAST

IHC

ELS (included in Finance Transformation)

CCAR/ DFAST - Summary

Summary of FRB feedback

- Immediately strengthen capital planning leadership and staff and conduct a comprehensive skills and staffing assessment and develop a hiring strategy
- Develop a comprehensive and detailed multi-year project plan to implement an effective capital planning process
- Immediately improve documentation of the capital plan and supporting materials
- Ensure an effective internal controls framework is put into place for the E2E capital planning process
- Senior management is required to develop robust processes for designing and selecting scenarios for enterprise-wide scenario analysis
- Develop a systematic, comprehensive, and repeatable process to identify weaknesses and deficiencies with the capital planning process

Sub-workstreams in CCAR

- Scenario Generation:** Generating idiosyncratic scenarios, including macroeconomic variable forecasts, based on SHUSA's specific risk profile and vulnerabilities
- End-to-end process and controls:** Formalized process for aggregating financial modeling and stress testing outcomes, including building financial reports with clear roles and responsibilities, processes, controls and personnel
- Governance and effective challenge:** Structured and documented process for R&C of all relevant elements of capital planning and stress-testing processes, enabling flow of information and feedback from all levels of SHUSA
- Documentation:** Defined structure and timeline for doc preparation, including the creation of templates, assignment of owners and multiple layers of review
- Capital assessment:** Analysis of capital and dividend payout levels to assess capital adequacy to meet regulatory and internal targets and limits across potential scenarios, including consideration of capital buffers

Potential key risks

- Significant dependencies on core execution elements across other CART workstreams, e.g., risk identification results, validated CCAR/ DFAST models, data quality related efforts across different workstreams
- Ability to strengthen aggregation capabilities within tight timelines
- Challenges in scaling up internal resources with the right profiles within required timelines
- Dependency on external resources, consultants and vendors to execute core end-to-end processes

Key deliverables

	Due by
▪ Documentation standards and templates for each category to ensure consistent inclusion of relevant information defined	08/31/15
▪ Inventory of spreadsheets & tools used in the CCAR/ DFAST process	09/28/15
▪ Updated SHUSA-wide Review & Challenge Framework	09/30/15
▪ Procedure to measure the uncertainty from Model, Data & Process	09/30/15
▪ Enhancement of capital plan submission	11/11/15
▪ Policies and procedures governing the self-assessment process	11/30/15
▪ Education sessions for the Board & Sr. Management to improve their ability to more effectively challenge outputs of CCAR/ DFAST	12/10/15
▪ Policies & procedures for scenario design and selection process	12/31/15
▪ E2E Process Documentation	12/31/15
▪ Enhance CCAR/ DFAST Internal Control framework and methodology	12/31/15

Key dependencies

- **Risk transformation:** Material Risk Program outputs
- **Model Development:**
 - CCAR/ DFAST Model Landscape & Roadmap, models for implementation
 - Model development documentation
- **Model Risk Management:** Model validation documentation
- **Operational Risk:**
 - Scenario analysis for relevant entities
 - Operational loss forecasting methodology
- **Finance:**
 - Capital management plan
 - As of and history for Y-14A
 - Strategic plan and SAS forecasting engine
 - Refinement of capital planning process governance

Sub-workstream	Deliverables / milestones	Start	Finish	Owner
End-to-end internal controls	• Inventory of spreadsheets & other similar calculation tools used in the CCAR/ DFAST process	08/03/15	09/28/15	Watson
	— Compile list of all critical spreadsheets used in each CCAR/ DFAST process	08/03/15	08/28/15	
	— Review and confirm use of each spreadsheet with workstream owners	08/31/15	09/16/15	
	— Provide Internal Controls with Inventory of Critical CCAR/ DFAST Spreadsheets	09/17/15	09/28/15	
	• Change management process to oversee the end-to-end process to identify and document changes and required internal controls	09/01/15	12/31/15	Watson
	— Identify Key Stakeholders and define roles and responsibilities	09/01/15	11/02/15	
	— Develop change management process flow and draft procedure	09/29/15	11/18/15	
	— Approve Change Management Procedures	11/19/15	12/31/15	Munoz
	• Enhance CCAR/ DFAST Internal Control framework and methodology ¹	07/13/15	12/31/15	
	— Establish project foundation, including communication plan, scope, stakeholders	07/13/15	07/23/15	
	— Obtain/review documentation, socialize and confirm current state findings with stakeholders	07/15/15	08/21/15	
	— Review and confirm outline for Internal Controls framework and reporting requirements	08/03/15	08/21/15	
	— Develop minimum standards for CCAR/ DFAST IC framework	08/05/15	09/04/15	
	— Recommend stakeholder reports/reporting metrics/dashboards	08/10/15	09/04/15	
	— Recommend testing methodology enhancements	08/17/15	09/04/15	
	— Conduct stakeholder working sessions to obtain feedback and confirm enhancements/ recommendations	08/26/15	09/11/15	
	— Finalize internal controls framework documentation, testing methodology enhancements and reporting metrics	08/31/15	09/18/15	
	— Senior Management review and implementation	09/19/15	12/31/15	
End-to-end process	• Centralized oversight and execution of CCAR/ DFAST cycle run process	06/02/15	08/31/15	Watson
	— Define Operating Model	06/02/15	06/11/15 ✓	
	— Define roles & responsibilities (including appropriate reporting lines)	06/02/15	07/30/15	
	— Define organization structure and resourcing needs (including staffing plan)	06/22/15	08/11/15	
	— Schedule periodic assessment of management and remediation progress to SHUSA board by external advisors	08/12/15	08/31/15	Watson
	• E2E Process Documentation	08/03/15	12/31/15	
	— Design sub process flows	08/03/15	09/30/15	
	— New Procedures documentation for the E2E process	09/24/15	11/11/15	
	— Test and verify new procedures	11/12/15	12/16/15	
	— Enhance procedures	12/17/15	12/23/15	
	— Approve new procedures	12/24/15	12/31/15	
	— Draft internal control narratives	12/03/15	12/31/15	

1. Execution will be performed by the Finance Transformation workstream

IHC

ELS (included in Finance Transformation)

IHC - Summary

Summary of FRB feedback

- Establish corporate governance guidelines that formally document and clarify the responsibilities of the board and committees thereof and board-appointed management committees
- Develop policy approval framework and Board reporting framework
- Conduct assessment and gap analysis of Board and management resources needed to implement and maintain appropriate oversight of risk taking and risk management activities
- Produce accurate aggregate financial regulatory reporting at the IHC and the combined U.S. operations, including an appropriate control framework that includes validation and reconciliation
- Implement IT Infrastructure and systems necessary to produce aggregated reporting, including centralized data warehouses for on-and-off balance sheet items and an appropriate control framework
- Make consolidation, netting, and accounting adjustments necessary to produce consolidated reporting

Sub-workstreams in IHC

- Corporate Governance and Oversight:** Development of overarching Governance and Oversight Framework including committee structures, charters, policy and reporting framework; gap analysis; execution across functions
- Legal:** Analysis and management of all the legal aspects of IHC creation and transfer of legal entities
- Tax Structure:** Analysis of the tax impact of IHC creation, entity transfer and residual planning

Risk, Finance and Data & IT components of the plan are addressed previously

Potential key risks

- Dependency on the timely delivery of technology capabilities
- Limited data availability and data quality across enterprise
- Management of dependencies spanning multiple workstreams
- High dependency on external resources, consultants and vendors
- Tight timeline to complete talent sourcing
- Uncertainty about future staffing needs

Key deliverables (excluding Risk, Finance and Data & IT deliverables required for IHC, addressed previously)

Due by

Corporate Governance and Oversight

- | | |
|---|----------|
| ▪ Draft overarching Governance and Oversight Framework document for SHUSA; syndicate and finalize | 11/30/15 |
| ▪ Conduct gap analysis against the overarching Governance and Oversight Framework, and develop multi-year execution plans | 01/31/16 |

Legal

- | | |
|--|----------|
| ▪ Perform transfer of entities (legal transfer of ownership) | 06/30/16 |
|--|----------|

Tax structure

- | | |
|---|----------|
| ▪ Refine analysis of tax impact of IHC | 02/29/16 |
| ▪ Residual Planning - attribute utilization, elimination of entities within current SHUSA structure, built in loss utilization, off-shore earnings repatriation, etc. | 02/29/16 |
| ▪ Entity Valuation - Implementation / Transfer Issues | 02/29/16 |

Key dependencies

- **Finance**
 - Regulatory Reporting
 - Capital Planning: Foundational Risk Management; Loss estimation methodologies; Resource estimation method.; Capital adequacy assessment; Capital policy and planning; Robust internal controls; Governance
 - ELS/Treasury: Cash Flows (2052(a)/(b)); Contingency Funding Plan; Buffers at CUSO and Branch; Governance, Policies, Procedures; Independent Review
- **Risk transformation:** Overarching Governance and Oversight Framework; Creation of Risk Committee; Appointment of U.S. CRO; Creation of Risk ID; Enhanced Risk Policies & Procedures; Creation of RAS; Completion of RDW
- **Data & IT:** Delivery of technological capabilities needed by finance and risk transformation workstreams

IHC project plan (1/4)

Sub-workstream	Deliverables / milestones	Start	Finish	Owner
Corporate Governance and Oversight	• Draft overarching Governance and Oversight Framework Document for SHUSA ¹ ; syndicate and finalize	07/15/15	11/30/15	Gunn
	— Establish core principles for governance and oversight of SHUSA and its subsidiaries, including role of and interactions with the holding company	07/15/15	07/31/15	
	— Define target state committee structure including Board and Management committees	07/15/15	08/15/15	Gunn
	— Articulate committee compositions, roles, decision rights, delegation of authority and distribution of responsibilities between the Group, SHUSA and its subsidiaries	08/01/15	09/30/15	
	— Document the overarching organization structure of SHUSA and its subsidiaries including reporting lines	08/01/15	09/30/15	Gunn
	— Develop policy framework, establish overall policies including guidelines for approval of policies	07/15/15	09/30/15	
	— Create overarching reporting framework for the Board and Management for SHUSA and its subsidiaries	10/01/15	10/31/15	Gunn
	— Syndicate Governance and Oversight Framework document with key stakeholders across SHUSA, the legal entities and the Corporation, incorporate refinements and finalize	11/01/15	11/30/15	
	• Conduct gap analysis against the overarching Governance and Oversight Framework document, identify gaps and develop multi-year execution plans	12/01/15	01/31/16	Gunn
	— Conduct gap analysis against the target state governance and committee structure, organization and roles, decision rights, delegation of responsibilities, policy framework and reporting	12/01/15	01/15/16	
Legal	— Establish comprehensive implementation plans to address these gaps over a multi-year period	01/03/16	01/31/16	Gunn / Plush / Somoza
	• Execute against multi-year plan (<i>multiyear plan comprises the plans across each of the workstreams – Risk Transformation, Model Risk, Model Risk Management, Finance Transformation and Data/IT Transformation</i>)	02/01/16	Ongoing	
	• Entities have been identified in the IHC plan submission (analysis to determine if they will be liquidated, sold, or contributed to SHUSA)	07/15/15	11/15/15	Pfirman
	• Perform transfer of entities through Davis Polk plan (legal transfer of ownership) ²	07/15/15	06/30/16	Pfirman
	— Services and Promotions Delaware Corporation & Services and Promotions Miami LLC contributed to BSI	07/15/15	06/30/16	
	— Banco Santander International transfer of shares to SHUSA	07/15/15	06/30/16	
	— Santander Global Property, U.S.A., Inc. liquidation	07/15/15	06/30/16	
	— Santander Investment Securities, Inc. shares contributed to SHUSA	07/15/15	06/30/16	
	— Santander Asset Management USA LLC liquidation	07/15/15	06/30/16	

1 SHUSA to be designated as the IHC going forward

2 The tasks associated with the transfer of entities take into consideration 8-12 months for regulators to respond
